> BaikoPolish product range **customization**:

- Implementation in **various media** (paste, slurry...)
- Optimized **design of the abrasives** in order to adapt to the application requirements (viscosity, pH control...)
- In case of formulations, **we can play on other important parameters** for polishing, complementary to the abrasive efficiency.

> Baikowski has **specialized in polishing for decades**. We upgrade our skills and equipment continuously to **find the optimal solution for each unique polishing case**:

- With cutting-edge specialized equipment for polish testing, we can measure and observe:
 - Removal rate (**Rr**)
 - Roughness average (**Ra**)
 - Peak-to-Valley (**PV**)
 - **Surface roughness imaging** to provide the optimal parameters for use in your polishing conditions.
- Our Japanese R&D team is completely dedicated to polishing, and has accumulated a **unique expertise**.

*Baikowski® provides you with **the best products adapted to your process, as well as advice to make the most of your polishing steps. We also offer accessories, like **pads and plates**, to help you **achieve your goal**.***

Applications

Any particular substrate to polish? Looking for more cut, or a brighter finish? Let us know your requirements and we will design the best solution for your needs.

Your solution partner for fine minerals
